## **Public Open House Opportunity to Participate in Downtown Hutchinson's Future**

Hutchinson is nearing the end of a planning process to create a Downtown Hutch Master Plan. As part of that process, the community is holding another in-person public open house where community members can view concepts for downtown and provide input on downtown's future. Understanding the community's desires for downtown is critical to this planning process.

All city residents and stakeholders are invited to attend the **in-person public open house on November 30, 2023, from 5:30 p.m. to 7:30 p.m.** at Memorial Hall (101 S Walnut St, Hutchinson, KS 67501).

The Downtown Hutch Master Plan will develop one, long-term, visionary plan for the future of downtown. The Plan will assess the current state of downtown; identify the downtown vision; identify downtown's biggest assets and challenges; and set forth policies and concepts for future land use, development and redevelopment, transportation, downtown character, public spaces, operations, economic development, and more.
